

Selected Resources for the Sonography Program 2015

The College of DuPage Library is located in the Student Resource Center. During the academic year, the Library is open every day of the academic year at the following times:

Regular Hours:

Monday - Thursday	7:30am - 10:00 pm
Friday	7:30 am - 4:30 pm
Saturday	9:00 am - 4:30 pm
Sunday	12 noon - 6:00 pm

For a current listing of holiday Library closings and adjusted vacation operating hours (when classes are not in session), consult <http://codlrc.org/hours>.

The Library Reference staff consists of 20 (10 full-time and 10 part-time) professional librarians and 11 reference assistants. The Library has two reference stations located on the main level and a third reference desk located on the Library's second level. A minimum of one librarian and one reference assistant are scheduled upstairs and down with additional staffing added during peak service hours.

The library liaison to faculty and students in the Sonography Program is Debra J. Kakuk Smith, Professor, Reference Librarian. Smith is an experienced instructor and medical librarian. For more information see <http://codlrc.org/smith>

Instruction and Reference Services

Students can access the C.O.D. Library's resources 24 hours a day, 7 days a week via the Internet at the URL <http://www.cod.edu/library>. Students must use their library card barcode numbers to access electronic databases and to place holds, I-Share and Interlibrary Loans (ILL).

Students receive reference assistance in person, by phone, email, or instant message during library operating hours. The electronic (email) reference service is called "Ask a Librarian." "Ask a Librarian" questions are answered throughout open hours of operation and students can expect a reply to their questions within 24 hours of submission. Users may instant message Librarians during open hours of operation using AOL Instant Messenger, Yahoo!, MSN, Google Talk, or Jabber chat services. Students may directly contact particular librarians as well. Smith's contact information is: Debra J. Kakuk Smith, SRC 3149, smithkak@cod.edu, (630) 942-4305.

An online **Diagnostic Medical Imaging Resources Guide** located at <http://codlrc.org/hs/dmi> provides students and faculty with: catalog links, recommended reference materials in the College of DuPage collection, Internet sites (including associations, organizations,

consumer/general information and reference sites), health information literacy information, and APA citation style tips. The materials range from those suitable for patient education to information geared to health science students and practicing professionals. The guide contains materials pertaining to their current studies as well as professional development resources. This research guide was created and is currently maintained with direct input from the Diagnostic Medical Imaging Faculty.

Students have access to **100+ Gateway Workstations** throughout the two floors of the main campus COD Library. In addition, **wireless laptops** with access to all library resources are available for student checkout and use within the library (including small group rooms and quiet study areas). The Library offers free wireless access for all users. The Library workstations and laptops have productivity software (Microsoft Office Suite) installed on them and a variety of printing options are available. Students can also load interactive, educational software and check-out headphones at the circulation desk. The workstations have software that reinstalls an original build every time the workstations are shut down or restarted. Reference librarians and computer support/print services staff are available to assist students with computer/technology-related questions.

A new **Media Lab**, <http://codlrc.org/lab>, is located in the Library's lower level and is freely available to COD Library card holders. COD students can create and edit all kinds of digital audio, video, and images in the Lab containing four imaging stations and two separate A-V editing suites. The Lab features high-powered Mac workstations and popular media production software like Adobe's Creative Cloud suite and Avid Pro Tools. Students can use high quality photo scanners, drawing tablets, a 3D scanner, DSLR cameras, microphones, and other audio peripherals.

Faculty members are encouraged to schedule specialized library instruction and research assistance with the Health Science Division Librarian, Debra J. Kakuk Smith. The Library and Health Sciences faculty work together to create quality information literacy assignments that assist the Sonography students in becoming lifelong learners. The library has six technical classrooms, including five hands-on computer labs equipped with enough workstations for (20-40 students) as well as an instructor station and digital projector. An additional library classroom is available with an instructor workstation, digital projector and three-dimensional document reader for demonstration classes. On and off campus classroom visits and instruction sessions can be arranged by contacting Debra J. Kakuk Smith.

Each semester of the academic year, including summer, the library offers free computer workshops for students to become Smart Online Searchers. Students may choose to attend, in-person or online, workshops on a wide-range of topics such as Introduction to the Library, Research Strategies, APA Documentation, Consumer Health, Job Seeking, Internet Basics and Advanced Online Search Strategies. Classes are offered during the day, evenings and weekends. Students can view information about current workshop offerings at <http://codlrc.org/sos>

Journals, Periodicals and Online Database Offerings

The College of DuPage Library provides print journals and periodicals in support of the Sonography curriculum. Students in the program also have access to periodicals through electronic databases. Through the College of DuPage Library Home Page (<http://www.cod.edu/library/>), Sonography students have 24 hour, 7 days a week access to the College of DuPage Library catalog and the article databases.

The College of DuPage Library subscribes to 120+ electronic databases and approximately 21,645 electronic books. Sonography students have access to numerous health and science related databases such as the Cumulative Index to Nursing and Allied Health Literature (CINAHL) Complete, Gale's Academic OneFile, HealthSource: Nursing/Academic and Consumer (from EBSCO), ScienceDirect, Micromedex Health Care Series (including CareNotes), The Joanna Briggs Institute EBP Database, and MEDLINE. Full text access is also available to numerous journal articles on line which expands the library's periodical holdings for students and faculty.

In addition to "traditional" periodical databases, the C.O.D. Library provides Sonography students with access to ADAM Interactive Physiology (Networked version), full-text reference book access using The Gale Virtual Reference Center, and test preparation materials available in the Learning Express Library. Streaming Videos are also available from a variety of electronic video databases. For descriptions of COD Library's Online Video databases, go to: <http://codlrc.org/databases/videos-online>

Sonography Program Journals

The College of DuPage subscribes to 478 print periodicals. Sonography students have access to over 100 online and print journals and magazines specific to Diagnostic Medical Imaging. Many other Health and Medicine-related titles are available. The Library periodical holdings (online and in print) are available for perusal online in a conveniently arranged subject list at: http://sc9jf5ze6e.search.serialssolutions.com/?V=1.0&L=SC9JF5ZE6E&N=100&SS_searchTypeJournal=yes&S=SC&C=HE0338 (See Appendix B: Imaging Journals, pp. 7-13).

Interlibrary Loan (ILL) & I-SHARE

Students enrolled in the Sonography Program have 24-hour access to our **Interlibrary Loan (ILL)** Department. Students and faculty are able to search and submit their requests for journal and periodical articles, book chapters and books electronically from COD workstations or at home. The College of DuPage has online access to thousands of Online Computer Library Center (OCLC) Libraries in our local area and around the world. These libraries provide our students and staff with access to millions of items that are not available in our collection. The Ariel Document Delivery System allows our interlibrary loan department to request and receive student interlibrary loan materials electronically from locations worldwide. Documents received through Ariel can also be emailed directly to students and faculty.

In addition to traditional ILL, students and faculty now have access to **I-Share borrowing**. When searching COD's catalog, Illinois holdings (including over 11.5 million unique bibliographic records and more than 36 million item records, representing the holdings of 82 Illinois College and Research Library I-Share member institutions) as well as international OCLC holdings appear. COD library users can request books from these participating Illinois libraries using their free I-Share accounts. While traditional ILL requests can take 5-10 days to arrive, I-Share requests typically arrive in 2-5 days.

Students and faculty may pick up their materials at the College of DuPage Library for free, or have the materials mailed to their homes for a minimum fee of \$2.00 per package. For materials that must be returned, items can be mailed, or dropped off at convenient College of DuPage book drops located on the main campus as well as the Regional Centers in Westmont, Addison and Naperville, Illinois.

Students can request assistance with the use of journals and periodicals via the “Ask a Librarian” online reference service (email), via phone, or in person.

Print Collection

COD Library holdings in Sonography and related disciplines provide a broad range of materials that are relevant to the curriculum. Students with the desire to do more research in the medical areas have access to over 9,500 medical-related books, audiovisuals and software programs. New library materials (including journals, books, software, models, DVDs and VHS tapes) are added to the collection on an ongoing basis. Acquisitions are based on the recommendations of program faculty and the recommendations of the division librarian, Debra J. Kakuk Smith, who develops the collection and manages its budget. Ms. Kakuk Smith utilizes the ***Doody’s Core Titles in the Health Sciences*** list, ***The Medical Library Association’s Master Guide to Authoritative Information Resources in the Health Sciences***, as well as other medical review resources to assist in ordering materials. The opinions and suggestions of program faculty regarding the current collection and possible new resources are solicited throughout the academic year. The division librarian coordinates weeding (deletion) of out-of-date materials with input from the program faculty. A core list of print, audio visual and software programs specific to the Sonography program is included with this report (See Appendix C: Select Sonography Library Resources, pp. 14-36).

College and Career Information Center

The College and Career Information Center (CCIC), located on the second floor of the library, provides a multimedia collection of information on educational opportunities, occupational choices, and job-seeking skills. Special databases are available to help in choosing an appropriate college or career. Trained staff members are on duty to assist users in this area and online assistance is available at <http://codlrc.org/ccic>. Examples of Sonography materials in the CCIC collection include licensure exam preparation review books; career guides for Sonography program graduates (videos as well as books); information on other academic institutions and admission tests/requirements; resume and interview materials for health care careers and Internet sites for Sonography-related organizations and associations.

Science Material and “Hands-On” Resources

In addition to the core Sonography program materials, the COD Library has an extensive collection of basic science material including: **anatomy, physiology, chemistry, pharmacology, and microbiology**. Students may also check out microscope slides, bones, anatomical models (See Appendix A), interactive software programs and other resources for hands-on experience and review. These items are physically housed at the Library’s Circulation Desk.

Audiovisual Materials

A variety of videos (VHS and DVD formats) and DVD ROM or CD ROM titles specific to the Sonography program are contained in the College of DuPage library collection. Streaming Videos are available from a variety of electronic video databases. For descriptions of COD Library’s Online Video databases, go to: <http://codlrc.org/databases/videos-online>. Additional audio visual (and print) resources also are available in the collection on topics such as human anatomy and physiology, Universal Precautions, HIPAA regulations, transcultural medical delivery, medical ethical and legal issues and other topics pertinent to health care students, faculty and professionals. Program faculty often preview and provide feedback on the usefulness and accuracy of audiovisual materials (DVDs, VHS, CD-ROMs) prior to the Library

purchasing the items. Program faculty review Library holdings to ensure clinical accuracy of content.

Individual video monitors, cassette and CD/DVD players as well as computer workstations are available on the first floor of the library for student and faculty use. A video viewing room is also available for group viewing. The Library has an audiovisual distribution center that delivers equipment to classrooms throughout the main campus and the west campus. The Library's faculty "booking" system allows instructors to reserve and pick-up AV materials for classroom viewing. Audiovisual materials and equipment can also be delivered to off-campus classrooms and regional centers.

Circulation Services

Faculty may place specific materials on reserve at the Circulation Desk for students. Reserve materials ensure that all students will have access to reference materials or other high-demand items. The reserve collection contains anatomical models for use within the library.

Students are able to place materials on hold by phone or online by accessing the library's Web site. Students may pick up hold materials at the circulation desk or have the materials mailed to them for a minimum fee of \$2.00 per package. Students may return items by mail or drop them off at convenient College of DuPage book drops located on the main campus as well as the Regional Centers in Westmont, Addison and Naperville, Illinois.

Library Anatomical Models**

The library has a large collection of models that can be checked out for student use at the Main Circulation Desk of the Library. An updated list of Anatomy Models arranged by type is available at: <http://codlrc.org/models>. Browse by type of model or search by a specific model (AKA "stomach"). Individual model pages include detailed descriptions, a digital image, links to related models, location and availability.

Deluxe 24-Part Dual-Sex Torso

This human dual-sex torso model has male and female organs for anatomical study, and disassembles into 24 parts for effective demonstration: three-part head, two-part stomach, female chest wall, two lungs, two-part heart, liver with gall bladder, four-part intestinal tract, front half of kidney. Can be checked out with **four-part male genital insert**, and/or **female chest wall and three-part female genital insert with fetus**.
