Ask Your Health Science Librarian

Do you need help finding information on a specific topic? In addition to using our face-to-face, online and phone [Ask A Librarian](#) options, you may call or email me to set up an appointment or to explain what you need (I can often help you via email). Please remember that while I can assist you in finding information and can educate you about locating and citing quality health resources, I cannot diagnose or recommend treatment for specific conditions or diseases. I also cannot interpret assignments--ask your instructor! I will always refer specific medical and assignment-related questions back to your health care provider or instructor. Your questions will be kept in confidence and your privacy will be respected.
